

RAVAS Data Collector - RDC

software tools

RAVAS

Transmitted data includes:

- weight: gross, net, tare
- scale ID nr.
- sequence nr.
- product ID code(s)
- date & time
- alibi number (when LFT)

RAVAS 5200 indicator with Xpico WLAN module inside

Operator uses the PRINT key to send the weight information directly to the server. The indicator can store 300 weighings for working 'offline'.

RAVAS 3200 indicator with Xpico WLAN module inside

Operator uses the PRINT key to send the weight information directly to the server. The indicator can store 8 weighings for working 'offline'.

Both indicators will auto-synchronize the stored data when back in WLAN area. Data integrity is secured using checksum algorithm with ACK/NACK messages.
