There are lots of costs associated with picking errors. Some hidden, some very visible. Errors in your picking process will result in lost or returned goods, stock differences, credit notes, phone calls and e-mails..... **loss of goodwill at your customers.**

The cost of picking errors may run up to hundred thousands per year and directly influence your bottom line profitability.

Bring your  
**supply chain**  
to the next level  
with RAVAS Connect me

**RAVAS**

Connect with RAVAS, and we will **improve** your  
**Pick process, warehouse performance and supply chain**  
(within a short return on investment)

**RAVAS** Mobile Scales, installed into the truck and our ConnectMe software,  
**RAVAS Data Manager** (or LogiAction), will bring your order picker to the next level.

**RAVAS** **Pick by Weight**, eliminates directly Order Picking errors on the spot

### **Bennefits:**

- Picking errors are corrected on the spot
- Cost reduction by eliminating picking errors.
- Cost reduction by cancelling final inspections
- Performance of each individual picker monitored (dashboard)
- Improved supply chain control and documented quality of your services
- Satisfied Customers
- Works in combination with ervery brand and Model (order pick) truck.
- Easy and quick implementation
