

RAVAS Integration Software (RIS)

For easy integration of the RAVAS mobile scales using Wi-Fi connections with any ERP or WMS

ID, Weight, Date/Time

- RIS acts as an interface between the RAVAS scales and your WMS/ERP system
- RESTful API makes integration with any WMS/ERP very simple
- All RAVAS scales need a static IP address
- RIS gives you a table with IP address, port number and alias name for easy ID allocation of each RAVAS scale
- Easy to install, maintain and expand
- Installation can be done local by your software experts
- RAVAS can support using TeamViewer if needed
- RIS commands will include:
 - *Get gross weight*
 - *Get net weight*
 - *Set auto-tare*
 - *Re-set auto-tare*
 - *Set zero*
